

- Revamp Moto Holds 25+ IP Assets.

Key Core Technologies IP

1. Attachment Swapping Mechanism:

- An Electro mechanical four point Locking mechanism, which can enable, quick swap within **30 seconds**.

2. Battery As a Powerhouse:

- Enabling battery of a vehicle to the power the power train as well as all other different appliances up to **250Watts**.

3. HOTKEEP:

- The Hot Keep Box is a temperature-controlled, swappable attachment for food delivery. Using forced convection, it maintains heat up to **70°–80°C**. Swaps in under 30 seconds for maximum flexibility.

4. COOLKEEP:

- The Cool Keep Box is a temperature-controlled, swappable attachment for cold storage and delivery. It maintains low temperatures ranging from **-5°C to -10°C** using compensation-based and piezoelectric cooling
