

The logo consists of the word "REVAMP" in a white, sans-serif font. The letters are stylized with horizontal bars above the first two letters ("R" and "E"), a zigzag pattern through the middle ("V" and "A"), and a large loop at the end of the "P". Below "REVAMP", the word "MOTO" is written in a bold, yellow, sans-serif font.

MOTO

BUILT TO ADAPT

Revamp Moto is a **Nashik, INDIA-based EV Startup** dedicated to empowering the underprivileged sections of society through the use of our transformative EVs.

We go beyond manufacturing two-wheelers—our modular EVs with patented swappable attachments (under 30 seconds) empower **micro-entrepreneurs, gig workers, and small businesses** to boost earnings while embracing sustainable mobility.

### The Problem

- **Employment & Credit Barriers** – 80% Indians work in informal jobs with limited credit access.
- **Unsafe Transport** – Improper cargo modifications cause accidents and inefficiencies.
- **Lack of Adaptability** – Businesses lack a streamlined last-mile logistics solution.

### The Solution

- **Modular EVs** – Built for B2B & micro-businesses, facilitating self employment.
- **Instant Swapping** – Change attachments in 30 seconds for different needs.
- **Affordable & Accessible** – Low-cost ownership with financing support.
- **Sustainable & Local** – 100% Made in India products, cutting emissions and creating jobs.

### Impact

- **Gig Workers** – Efficient EVs help gig workers earn 1.5x more income, (approximately ₹60,000 per month) boosting their financial stability.
- **Underprivileged** – Our EVs enable low-investment mobile businesses for the underprivileged, with reduced fuel & maintenance costs ensuring sustainable profits.
- **Women Entrepreneurs** – Easy-to-use, low-maintenance EVs also empower women-led businesses and promote financial independence.
- **Environment** – Our EVs have already offset over 125 tons of CO<sub>2</sub> and are on track to offset more than 450 million kg of CO<sub>2</sub> in next five years, driving the green transition.
- **Economy** – Creating jobs in manufacturing, servicing, and logistics, contributing to economic growth.

### Our Mission

"To impact over 1 million lives by 2028."

### Our Vision

"Empowering Society by Providing Sustainable and Adaptive Solutions."

## BUSINESS SNAPSHOT

### Key Investors
